THE HOTTEST GAME

Level two is so hot, that some of the printing houses refused to print it. There is no bolder game available on the market right now!.

The series consists of three levels and has Extra additions to each of them. Each level has the same rules of the game, but each one, in turn, exposes new and bolder missions for lovers. The Extras will make the tasks more attractive with the inclusion of new items, places, disguises, and accessories. All Extras can be combined to create even spicier challenges or used to diversify them into missions from the basic version of the game.

■ LEVEL 1 ROMANTIC

Romantic is the initial level, aimed at rekindling the romance, bringing forth erotic playfulness and also a bit of naughtiness. At this level, there is nothing that goes beyond the generally accepted norms, although sometimes partners may be a little bit surprised by it.

This level is great as an ice breaker or rekindling that feeling of spontaneity that existed at the start of the blossoming romance.
