The Lovers

Exclusive Erotic Game

A new quality of games
for couples

thelovers.eu

The Lovers is a unique series of card games, the rules of which mean that this is not an adventure for only one night, but erotic entertainment that will last for weeks possibly months.

The game was created especially for couples who want to diversify their sex life, add more spice to it and discover new sexual fantasies.

DIFFERENT THAN OTHERS
Very original rules which make this game all the more special, a similar one cannot be found on the market

KEEPING TENSION ON CONTINUOUSLY
The rules make lovers feel endless stimulation and excitement. They never know when and what their partner is conjuring up for them.

FOR DEMANDING ADULTS
Whether partners are in a new relationship or they are finding things a bit stale - this sex game is for all of them. It spices up everyone's life!

PLAY FOR MONTHS
All standard games usually start and finish in one night but not this one. *The Lovers* can be played for weeks and months if desired. It engages both partners heavily.

PREMIUM PRODUCT
Every card has its own unique graphic and is made of the best quality professional poker cards - it is not only nice to play but to look at as well.

THE HOTTEST GAME
Level two is so hot, that some of the printing houses refused to print it. There is no bolder game available on the market right now!

The series consists of three levels and has Extra additions to each of them. Each level has the same rules of the game, but each one, in turn, exposes new and bolder missions for lovers. The Extras will make the tasks more attractive with the inclusion of new items, places, disguises, and accessories. All Extras can be combined to create even spicier challenges or used to diversify them into missions from the basic version of the game.

■ LEVEL 1 ROMANTIC

Romantic is the initial level, aimed at rekindling the romance, bringing forth erotic playfulness and also a bit of naughtiness. At this level, there is nothing that goes beyond the generally accepted norms, although sometimes partners may be a little bit surprised by it.

This level is great as an ice breaker or rekindling that feeling of spontaneity that existed at the start of the blossoming romance.

■ LEVEL 2 Hardcore

Level two has bolder missions at its heart and is set to the theme of domination and submission.

This level is recommended for those who want to experience something more while having fewer limitations with their intimacy. Partners perform their tasks according to the roles they play.

Hardcore level comes in two versions: *Master & Slave*, where the cards are arranged according to the roles, and *Switch* version, where partners exchange their roles to make the game more diverse and surprising.

STORIES

Stories is the next release of the series. This time, the partners play the characters of erotic stories. Each presented description consists of a pair of scenarios surprising with an original plot, spice and perversion. As in other parts of the series, the basis of the game is not knowing your partner's cards, thanks to which *The Lovers Stories* masterfully builds tension between partners.
